Albér Universal Xplorer Industrial Monitor (UXIM) and Universal Xplorer Telecom Monitor (UXTM) Xport Firmware Release Notes

VERSION 4

Release Notes Section Outline

- 1 Updates for This Release (Version 4)
- 2 Version 3.38 Update Information
- 3 Version 3.33 Update Information
- 4 Version 3.24 Update Information
- 5 Version 3.10 Update Information

1 Updates for This Release (Version 4)

In order to add documentation to the Agile/LES system, the firmware version/revision number moved from 3.38 to version 4. That is the only change with this release.

2 Version 3.38 Update Information

- Signed Java application for 2016.
- The temperature graph now displays after time sync.

3 Version 3.33 Update Information

This release added the capability to allow the pass-through of MODBUS commands.

4 Version 3.24 Update Information

This release added ambient temperature support [internal reference number 2550].

5 Version 3.10 Update Information

This was the initial release of the UXIM/UXTM Xport firmware.
