

Vertiv™ Environet™ Alert

Release Notes

VERSION 1.4.1, SEPTEMBER 2022

Release Notes Section Outline

1. Features and Bug Fixes
2. Supported Software Information
3. Technical Support Information

1. Features and Bug Fixes

This version of Vertiv™ Environet™ Alert focuses on minor feature enhancements, bug fixes, and platform updates. For simplicity and clarity, not all minor tasks (with reference numbers) have been included in this release notes.

Version 1.4.1 Features

REFERENCE NUMBER	DESCRIPTION
US478	“Upcoming Maintenance” label simplified to “Maintenance”
US508	Create a new BACnet device when changing the Object ID
US523	Device CSV export/import – added “Path” Column

Version 1.4.1 Bug Fixes

REFERENCE NUMBER	DESCRIPTION
DE507	Unable to Bulk Enable Alarming by Point Type
DE538	Apache version update
DE540	Bulk Editing Boolean and Register Points Alarm Value fails
DE561	The 'Alarms' pop-up cannot be closed while the 'Status update' notification is active
DE571	Deleting a Device with Trap Alarm Records fails
DE575	Editing a user deselects the 'Never expires' option
DE577	Copying an Existing Device throws error when using SNMPv3
DE578	Analytics – Visualization list is in random order
DE579	Analytics – PDF export text overlaps
DE591	Copy Asset fails

Version 1.4.1 Bug Fixes Continued

REFERENCE NUMBER	DESCRIPTION
DE607	Error when editing Enum Values in bulk
DE611	Sites Dropdown is not fully visible in device bulk edit model
DE615	An error occurs when attempting to add a certain number of points to a tenant
DE619	Trap Configuration is not set on CSV Import
DE620	Deleting the Info Alarm Class fails
DE622	LDAP Login - create accounts with the same name but different capitalization
DE624	Groups labels added to a floor plan view with "Show All Statuses" only show overall status
DE625	Receiving an email for an alarm with no value results in a macro error
DE628	Error from Frequent Lost Connection with server
DE629	Disabling a device does not remove its system level status
DE630	LDAP user properties cannot be modified
DE631	Creating a Boolean calculated point using the "or" function or using a point with a down or fault status will show the wrong Boolean calculation
DE632	Device still uses values from deleted point
DE634	Username field has no character amount limit
DE635	"Equal to Date" filter in tables does not filter correctly
DE641	Analytics – Images are not displayed when exporting a report with a user image
DE646	Only 500 alarms are kept in the Alarms Database
DE658	The Total KW Capacity does not allow values with a decimal when creating racks
DE665	Analytics – The table in a PDF report is rendered compressed when it contains only one item
DE667	Device IPs do not update using CSV import
DE672	Adding an SNMP device using v3 leads to a "return no object identifiers" message
